**From trusted Legionella & Tech experts**

# How does it work?

01

Smart sensors are easily retrofitted with no modification needed to your existing pipework .

02

The sensors are pre-calibrated to ensure accurate temperature readings with data collected wirelessly by the AQUAfi system.

03

AQUAfi keeps an eye on your system 24/7 making sure you are always compliant. No more waiting for an operative to pop by monthly to test, or for you or colleagues to find the time, AQUAfi is always on.

04

Each month we will then email you a report for records for your compliance files. For added peace if non-compliant temperatures are picked up, we will be in touch to discuss and resolve.

**It's as easy as that.**

## Know-how + experience

AQUAfi brings together industry experts from Legionella compliance AND smart technology. Clever bunch. That knowledge has been combined with big dollops of practical and industry experience to make your life much easier.

### Hello Headspace!

If water temperature monitoring or legionella compliance is part of your job, then we've got good news for you.

Your job's about to get easier.

Keeping people safe from the risks of Legionella is not only a decent thing to do - it's a legal requirement. If you are responsible for a commercial OR residential property, then you need a Legionella risk assessment carried out at least every two years.

Water temperature monitoring is one type of action that could be outlined as an action on your Legionella risk assessment. It'll all depend on your building and levels of risk.

If you want advice based on decades of experience in Legionella compliance, then you're in the right place. Not only do we offer a super practical solution to water temperature monitoring for Legionella compliance, we can also help you with the rest of your compliance.

## About Aquafi

Supporting people in compliance  
Compliance can be technical - sure. But it's also  
about people.

Aquafi came to be when three clever heads with an  
eye for great customer service decided to pool  
their experience and create a service people  
recommend - compliance help, automated to save  
time, backed-up by a ton of knowledge and  
amazing customer service.

Bringing together decades of experience in  
compliance and tech, the Aquafi Directors are a  
wealth of knowledge and practical solutions. Using  
innovation and smart tech, the Aquafi water  
temperature monitoring solution comes with all the  
kit, installation AND monthly reports included in  
the price.

Why overcomplicate things?
